

Research Intern (paid position)

Neoleukin Therapeutics is seeking exceptional interns to join our Research and Development team for the summer! If you are a current student working towards your MS or PhD in the fields of Life Sciences and/or Computer Science and share our passion for improving lives...please apply!

Start Date: Summer 2019, Flexible.

Length of Assignment: 12-16 weeks.

Work Hours: 40 hours per week.

The mission of Neoleukin Therapeutics is to develop breakthrough de novo protein therapeutics. In general, this internship will focus on the development of de novo proteins and/or computational tools for protein engineering. The intern will have the opportunity to be involved in techniques encompassing biochemistry, molecular biology, cell biology, and computer science.

Only a few spots are available for this unique opportunity, therefore we encourage early applications.
